

Community Contributions

Rockline Industries is committed to investing in our local communities and school systems. This philosophy can be seen through recent donations we have made to the educational systems in Sheboygan County. The first investment was through a partnership with **Sheboygan Area School District**, other local manufactures and **Lakeshore Technical College** to build state of the art technology centers at both **Sheboygan North and South High Schools**. The technology centers were developed to give students an opportunity to gain hands-on experience in the manufacturing, technical trades and engineering fields while still in high school. This education will better prepare graduates with the technical skills they need to enter the workforce.

Rockline recently made a financial donation to support **Lakeshore Technical College's (LTC's)** Center for Manufacturing Excellence Building. This center is equipped with state of the art equipment that is utilized to prepare post-high school students for careers in manufacturing, technical trades and engineering. In the past 10 years, **LTC** has been instrumental in developing over 25 of our skilled trade associates. We have also utilized **LTC** for safety, soft skills, quality and lean training.

Eric Schoerner a recent graduate of **Sheboygan South High School** was awarded the Rockline Technical Pathway scholarship. Schoerner is enrolled in **Lakeshore Technical College's** Electro-Mechanical program. The Technical Pathway scholarship is awarded annually to a student pursuing a 2 year technical degree with a manufacturing pathway focus in either maintenance, quality assurance, supervisory management, logistics or supply chain.
